Hand Care

INSTRUCTIONS

Exfoliate dry surface skin 2-3 times daily with **Enzyme Cleanser** followed by using **Aloe Moisture Cream** rubbed in well.

Other daily washing should be followed with using **Aloe Moisturizing Lotion**. Two times each week, mix 1/4 tsp. of **Mask Powder** with 1/4 tsp. **Mask Liquid** and rub onto hand surfaces, let dry, add enough **Mask liquid** to loosen the mask-wipe clean with a soft cloth and apply **Aloe Moisture Cream**.

Do NOT remove the mask with water as this will wash away all the nutrients of the mask treatment.

Apply **Cuticle Aid** two times daily to cuticles and any cracked skin areas.
