## **TELEPHONE PRESENTATION FOR LINEN WRAPPING**

The Set-N-Me-Free body wrap is made of only aloe vera and herbs. Cotton cloth strips that have been soaked and heated in the all-natural solution are wrapped around the body in a mummy style wrapping.

Are you familiar with aloe vera? Aloe is very good for the skin and it helps your skin absorb the herbs that are in the solution. We put the wraps on very warm so the pores will open, allowing the solution to be absorbed faster.

You will lounge comfortably in the wrap for 45 minutes, covered with a blanket to stay warm, but you should not perspire. During that time, you will be very relaxed and comfortable. Many clients go to sleep or you can bring a friend to be wrapped and lounge at the same time.

After the wrap, you will feel fresh and thin, your skin will be clean and smoothed. You will feel more toned and the skin tightened. It is important that you drink about a gallon of water (3 - 4 liters) in the 24 hours after your wrap treatment.

Not like in a water loss or dehydrating body wrap, you will feel even better a day after your wrap, after drinking the water. The absorbed solution can stay for three days. If you drink the same amount of water each of those three days, you will keep the fresh and thin feel and it gets even better.

There are no dehydrating salts, minerals or clay in the Set-N-Me-Free Solution and no chemicals. Your skin will feel smooth and moist. After the wrap, you will feel rested, fresh and smooth. Your clothing will slip on easily, a definite difference in how your clothing feels after each body wrap. The aloe solution leaves your skin soft and supple for days after each treatment.

We will wrap you over your underwear, cotton working the best. You will want to bring extra underwear so you have dry ones to wear home. To condition your skin for the wrap, bathe or shower with no soap. Use hot water and a loofa or cloth, scrubbing extra where you want to have the most absorption of solution.

Do not use bar soap or any lotion on your skin before the wrap. These contain animal fat and mineral oil, which will clog pores. We need your pores as clean and open as possible for the solution to absorb quickly. We will show you an Aloe Body Wash that you will be able to use during a series of body wrap treatments.

A single wrap costs \_\_\_\_\_. If you decide to take a series of wraps, it may be applied toward a lower series pricing. Most people get one treatment, then decide.

What day did you have in mind for your wrap? Would you like morning or afternoon? We are open a couple evenings each week or Saturday if you work during the day.

**IF NO APPOINTMENT IS MADE OR IF ONE IS MADE A WEEK AWAY:**

"If you will give me your address, I will mail you a copy of the Body Wrap Facts brochure. It answers a lot of questions that you may think of later."

**READ BACK THE APPOINTMENT TIME, DAY, AND TELEPHONE NUMBER.**
