

## Body Wrap the Face

### **Set-N-Me-Free Products used:**

Aloe Enzyme Cleanser

Body Wrap Solution Gel

Plastic film strips

Time: 20-52 minutes = 6 minutes prep/apply; 20-45 minutes leave on; one minute removal

The Body Wrap Solution Gel has a low pH so the client will likely feel tingling until the plastic film is in place. As with any skin care product, if your client has many allergies a skin test should be done one day prior to treatment.

When offered: During a body massage, manicure or pedicure, and following a facial. This treatment is usually combined with a chin and neck treatment.

How to: Cleanse with the Aloe Enzyme Cleanser, rinse with fresh water. Using a fan brush, apply the Body Wrap Solution Gel to the face, chin and jaw. Cover with strips of plastic film (saran wrap) leaving openings for the nose, mouth and eyes for client comfort. Leave on for at least 20 minutes with best results at 45 minutes. Remove the plastic film and using upward strokes, massage the gel into the skin. Do not wash off the excess gel.

### **Home Follow up**

Aloe Enzyme Cleanser - daily

Body Wrap Solution Gel & generous water intake - daily

Hydrate with Moisturizing Aloe Milk or Day-Night Emollients - daily

Salon follow up: Schedule client for a full body wrap treatment every 4-5 days.
