

Echinacea Mask

Everyone's favorite herb will work wonders on oil-prone skin. This is a very easy mask to mix and will become very popular with young clients. Schedule weekly facials and enjoy the many referrals your clients send to the salon.

Mix contents of one capsule of Echinacea herb powder with one teaspoon Set-N-Me-Free Mask Powder. Stir in drops of Set-N-Me-Free Aloe Comfrey Gel until the mixture is a thick gravy consistency.

Clean moistened skin with Enzyme Cleanser to deep clean clogged and darkened pores. Remove the cleanser with clear warm water.

Smooth the thick masking mixture over the affected area. Leave on until it dries (about 10 minutes).

To remove the mask, drape the towel that has been soaked in Aloe Misting & Masking Liquid or Natural Aloe Liquid over the masked area and leave for 1 minute to soften the mask. Gently wipe the area clean with the towel. Use the Aloe Mist to soften any mask that is still on the skin and continue to wipe it away until you have a clean finish.

Apply Set-N-Me-Free Aloe Comfrey Gel smoothly, leaving it as a glaze on the area. Leave Set-N-Me-Free Aloe Comfrey Gel on as long as possible. Client will like the facial results by leaving the gel on overnight. If makeup is necessary to be applied, use only a small amount of Set-N-Me-Free Aloe Comfrey Gel and rub it in well. Apply makeup as usual.
